STANLEY HOUSE,

WATER STREET, AUGUSTA, ME.

G. W. RICKER, would respectfully announce to the Travelling Public that he has re-opened the Stanley House, Augusta, and furnished it throughout with NEW and ELEGANT FURNITURE, and made every arrangement necessary to continue it as a First Class Hotel.

This is the most centrally located House in the city, being directly opposite the Depot, and in close proximity to the steamboat landing, Court House, Post Office, and but a few minutes' walk from the State House.

Business men, or persons travelling for pleasure, will find that this House affords every convenience or luxury that can be desired, and the Proprietor is determined to spare no pains to make it in every respect second to none in the State.

Hacks for all Stages leaving town will be kept at this House.

In connection with the above are good Stables with attentive and careful Hostlers.

THE HATCH HOUSE,

Main Street, Bangor, Maine.

This House has been thoroughly repaired, refitted and refurnished throughout with New Carpets, Furniture, Beds and Bedding, and is now open for the reception of company, under the charge of the subscriber.

It is a large, commodious, and well furnished House, situated on Main Street, near the centre of the city, and within a short distance of the Steamboat Wharves and the Depot of the P. & K. Railroad, to and from which Coaches are always in readiness to convey passengers.

Its numerous advantages to strangers, and particularly to those visiting the city on business or for pleasure, renders it one of the most desirable Houses in the city.

Connected with the House is a large and commodious Stable, in charge of competent and faithful hostlers.

By strict personal attention to the comfort of his guests, the proprietor hopes to receive a liberal share of patronage.

Singer's Sewing Machines.

THESE celebrated machines are in practical and profitable use in all parts of the civilized world. In all the various trades, and in sewing every sort of fabric, either of cloth or leather they have been fully tried and approved. Sewing machines of other manufacturers often fail to work, but SINGER'S MACHINES ALWAYS OPERATE PERFECTLY, being strong, durable, and complete in construction and workmanship. A perfect Sewing Machine kept employed affords a clear profit of $1000 a year, but an imperfect one is a cause of constant vexation and loss. The entire reliability of our machines is one great reason for their unparalleled popularity.

MACHINES FOR FAMILY SEWING,

of a fault and delicate construction, are recommended by other manufacturers. Such machines are made to catch the eye, but not to perform substantial work. The truth is, family sewing machines ought to be stronger than any other, because they go into less skillful hands than when sold to manufacturers, and are used for a greater variety of work. The machines which have proved best for all other purposes must be best for family use, and they are Singer's. The speed of our machines is lately been doubled. No other can compare with them in quantity of work.

Now machines, of the latest improved style will be exchanged, on liberal terms for old sewing machines, of our own make, or for depreciative machines of other manufacturers. Local agents wanted to sell our round machine.

N. B.—All persons desiring full information about sewing machines, can obtain it by applying for a copy of "I. M. Singer & Co's Gazette," a paper devoted entirely to the subject. It will be sent gratis.

650,000 Acres Selected Pine and Farming Land

IN MICHIGAN.

THE SAINT MARY'S FALLS SHIP CANAL COMPANY

OFFER for sale these lands, which are principally situated in the lower Peninsula, of Michigan, on and in the vicinity of the large streams and rivers, easy of access, and selected under more favorable circumstances than

Any other Western Lands,

Were chosen with particular reference to their location on the streams and the quantity and quality of the pine timber. On this account,

For Lumbering Purposes,

They are very desirable and valuable. The streams are large, and capable of floating logs at all seasons of the year, with harbors at their mouths on the Lake. At many of these points settlements and extensive lumber operations are formed and conducted with uniform success, proving already the most profitable lumber operations in the Union, and having access, by means of Lake navigation, to

CHICAGO, DETROIT,

and the other great Lumber Markets of the country.

Tracts of from 40 to 40,000 acres

will be found at convenient points, affording opportunities for either a small or the most extensive lumbering operations. A large portion of these Lands are among

The Best Farming Lands of the West,

and as they contain enough of the FINEST PINE TIMBER to more than pay for the land, fencing, moderate buildings, and other improvements, offer very superior inducements to farmers seeking a western home.

The Climate is Mild and Equable,

and soil and climate both suited to all the grains, fruits, and products raised in the most favored portions of the West.

Companies of 10, 15 or 20 Persons,

with their families, will find location just suited to the formation of a settlement, with good water power, and convenient access to neighboring settlements.

TERMS:

One-fifth will be required at the date of sale, and the balance in one, two, three and four years, with interest at six per cent per annum.

The Company have full and complete descriptions of each tract of their lands, from actual exploration by several different parties, with accurate maps of each township, according to government surveys. These may be seen at the

Land Office of the Company in Detroit, Michigan.

Copies of Maps, field notes, and other information concerning the lands will be furnished, without charge, to those wishing to purchase.

Large Maps of the State, showing the lands of the Company, will be found at public places in most of the principal towns in the Eastern and North-western States.

To the Stockholders of the Penobscot and Kennebec R. R. Co.—The call for a Special Meeting of the Stockholders, to be held at Kendall's Mills on Thursday the 20th day of November, 1856, is withdrawn, and the following call is issued in place of it:

Special Meeting,

Penobscot and Kennebec Railroad Company.

The Stockholders of the Penobscot and Kennebec Railroad Company are hereby notified that a Special Meeting of the Stockholders in said Company will be held at Bunker's Hall, at Kendall's Mills, on TUESDAY, the twenty-fifth day of November, A. D. 1856, at 1 o'clock A. M., to act on the following objects:

1st. To see if the Stockholders will ratify the contingent lease of the Road to the Androscoggin and Kennebec Railroad Company, executed by the Directors of the Penobscot and Kennebec Rail Road Company.

2d. To see what measures the Stockholders will take to pay the floating debt of the Company.

By order of the Directors,

ELIAS MERRILL,

Clerk of Penobscot and Kennebec Railroad Company.

Stockholders will pass free to and from the meeting over the And. & Ken. and Pen. & Ken. Railroads.

Notice to Wood-haulers.

BY order of the Court of County Commissioners of the County of Penobscot, sealed proposals will be received at the Clerk's Office of said County, for furnishing eighty cords of merchantable green hard wood, and twenty cords of green hemlock, with the bark on; the hard wood, than one fourth of the hard wood to be beech, the remainder to be maple and yellow birch. Said wood to be piled in the Court House yard, and then surveyed by some competent surveyor—the whole to be piled and ready for survey by April first next, after which it is to be sawed and properly split for the several fires in the Court House and Jail, and then dried up to dry, and afterwards piled in under cover, the hard wood in the sheds in the rear of the Court House, and the hemlock in the place designated by the jailer, the piling to be completed by the first of July next.

Two-thirds payment to be made when the wood is surveyed, the balance when the work is completed. Satisfactory assurances will be required for the faithful performance of the contract. Said proposals to be handed in on or before Friday, December 12th, 1856.

The Commissioners will not be bound to consider any proposal unless it be guaranteed by some responsible person.

Cheap & Convenient Building.

Door, Sash and Blind Factory.

A. DUNBAR

HAS been very successful in completing several contracts for Door Frames, Doors, Window Frames and Sashes, and Blinds, for good dwelling-houses and other buildings to be erected in this city, the coming season. He has excellent workmen in his employ, and has superior stock, so that he is now able to supply to those about to build the best articles of Door Frames, Window Frames, Sashes, and Blinds, made to any dimensions and of superior quality, either for a whole building or for a less quantity. The trouble and expense of building is very much lessened by having these articles made separately, so that the carpenters have only to put them in their places in the structure.

This business has now become so well systematized that only a small margin is left in advising beforehand the cost of a dwelling-house, when the work is of a uniform excellent quality.

Any one interested can examine specimens of the work at the factory, near the Rose Place, or at the store of M. B. Jackson, on Exchange st., and at either place any article may be obtained or large quantities ordered.

Mr. Dunbar is also prepared to furnish Window Blinds ready painted, and will hang them at the shortest notice.

By long experience, and by determined perseverance, the subscriber is now enabled to suit his customers, both in quality and price, and he well organized in the business that no man should now think of building in the old and slow, and imperfect methods.

WEDNESDAY, NOV. 19, 1856.

The Railway Festival—Montreal and its Attractions.

The Railway Festival closed on the 13th with an Excursion round the harbor and up the river by steamboat, in the afternoon—the Inauguration of the Water Works at noon—a Review of the troops in the afternoon at the Champ de Mars, (a magnificent parade ground of nearly a thousand feet in length)—and a Grand Ball and display of fireworks in the evening.

The Excursion in the morning was in three or four large steamers, carrying about four thousand persons. They were landed at Point St. Charles, two miles above the city, to view the immense masonry in the piers and approaches of the Victoria Bridge. Trains by rail to the Wheel House of the new Water Works which were inaugurated at noon. These works are just completed—having cost the city only £295,000, and affording an unlimited supply. The water is taken from the St. Lawrence, five miles above Montreal and brought by aqueduct to the great "Wheel House" mile or more from the city, whence it is pumped by water wheels into immense reservoirs 620 by 173 feet on the surface and 25 feet deep, 235 feet above the level of the harbor and containing when full 15,000,000 gallons. The water is sweet and limpid—clearer than any of our spring waters—but from its mineral solution producing a laxative effect upon those not accustomed to its use. The "native" and others frequently dash it with something and kill the insects.

The Review of the Troops was of the 39th Regiment of regular troops, (lately returned from the Crimea) a (d six) regiment of Volunteer Riflemen of the city—together about 1200 troops. The Review was by Lieut. General Sir W. Eyre by his staff—after which a very interesting representation of a battle (omitting the somewhat important part of the killed and wounded) The charge by bayonet and repulse from line and hollow square and the volley and running fire of the musketry were exciting. The fire was incessant for half or three quarters of an hour. We were favorably impressed by the personal appearance of these troops, (the dress and drill being of course perfect.) It rather surprised us to find the regular troops nearly all young men, and chosen for their having countenances expressive of the higher grade of Anglo-Saxon intelligence. They are decidedly too fine a class of men to be mere cannon fodder for powder. This regiment, when it came here from the Crimea was received with a public ovation, of the most splendid description—and we think it even worthy of it.

The Grand Ball in the evening was in an immense hall and an extensive list of rooms over the whole length of the Jacques Cartier Market—a building of giant size, about 400 feet long, which was erected within a few years at an expense of about $200,000. So soon as a company was probably rather before one assembled at a ball-room in this country, where any dancing was attempted. We think there were of less than six thousand persons present—many of the ladies dressed in the most elaborate manner and in a great variety of styles, some of which are not to be seen in the States. There was satisfactory evidence in the crush, however, that the all prevailing and still expanding hoop is as universal and as popular in this loyal Province as elsewhere. We suppose there might have been a million or so of yards of wholesome in the rooms; but don't pretend to any accurate statistics on this mysterious subject.

Any detailed description of the rooms (splendid by decoration), or of the dancing is impossible in the limits of this article. People were there from the whole extent of Canada, and from the Kennebec River to Maine in the United States.

The Supper was elegant and beautiful but the supper room accommodated only a double of hundred people at one time. It was necessary to limit each sitting of a number of seven minutes outing time and even at that the banquet lasted from 11 till 3 or 4 o'clock—the dancing of course meeting all the time.

During the early part of the evening there was a very fine display of fire-works in the vicinity of the ball room.

The celebration which was close by these festivities reflects great credit upon the liberality of the people of Montreal and the Grand Trunk Company. The expenses of the Banquet, Ball and other free entertainments to the guests, must have been very large—there being at least ten thousand strangers present; and in a city no larger than Montreal, this must of course have produced a considerable stringency in the provision line. There was nevertheless a great profusion of everything, both at the Banquet and the Ball, and also in the hospitable houses of the citizens, many of whom opened their doors to those who found difficulty in procuring quarters. The arrangements appear to have been quite thorough for taking care of the numerous guests; but there was one deficiency which caused our Maine people a good deal of trouble and produced some feeling on the night of the arrival of the excursion trains. In order to make certain that all should have some place to rest, two steamboats were engaged to lay at the wharves, and receive and provide for all such of the Maine and Boston delegations arriving by the excursion trains, as should desire to remain there or could get no immediate lodging elsewhere. This was an excellent idea; for if it had been carried out as we suppose was intended, it would have prevented any necessity of resting in a strange city by night on subject to the extortions of cab drivers (the ancient cab is the prevailing institution here in the carriage line.) But the difficulty was that the steamboat people somewhere then carried out a game of extortion and plundering upon the unhappy fellows who had ladies under their care and no lodgings previously provided.—They would not permit a soul to stay on either of the boats, unless he would engage board thus far,—and up to yesterday no lodging had for the whole time of the celebration, and take had formed in our river.

with twelve inch berths at the rate of six dollars per head for the two days! Not a lady could get even a cup of tea unless she would pay the six dollars down, and we were informed that one party of six persons only were able to pay $48 before they were allowed quarters on board even for the night. This plundering was felt to be an imposition; and the fact that it was not prevented by some committee, was, as we remarked, a deficiency in the arrangements. We presume the gentlemen of the Mechanics' Institute, and others who had charge of the arrangements had no suspicion that such a thing would be attempted. With this exception the guests generally met no difficulties other than are usually incident to such occasions; and large numbers of them met with the most kind and hospitable treatment from citizens, who placed their houses and their time at the service of the strangers.

Montreal is a beautiful city—built in a very expensive and massive style of architecture—intended apparently to last for centuries—the buildings being mostly of stone and brick, with tinned roofs, and the quays built solidly of granite, with the principal streets and sidewalks paved also with granite. The city has grown very rapidly within the past thirty or forty years—having increased from a population of less than 10,000 in 1816, to 27,000 in 1831—57,000 in 1851,—and (as estimated) 70,000 in 1856. This shows an increase of more than thirty per cent within the last five years—boasting the most of our American cities and towns. Montreal has had at times almost a monopoly of the import trade for the Province westwardly, and is looking now with good reason, for the enjoyment of a vast business not only in imports, but in exports from the great West, as a consequence of the opening of the Grand Trunk and of the extensive ship canals built and to be built, enabling large ships to pass the rapids and falls of the St Lawrence and the connecting links between the Lakes, are preced from Chicago to Montreal without breaking bulk. Here the cargoes will mostly be transhipped into ocean going ships, although vessels can pass the canals of sufficient capacity to go with safety and profit directly to Liverpool or other foreign ports.

Most of the country people seen in the streets of Montreal, and a large portion of the population of the city, are the French Canadians and that idiom of the French language is mostly spoken by the lower classes, many of whom can speak English. They are mostly Catholics, and Montreal is the head quarters of the Catholic establishments. Priests, friars, and nuns are very numerous there—more so, probably, than in any city in the country outside of Mexico—and the frequent appearance of priests and nuns in the streets, in their peculiar costumes, is one of the most novel sights to Yankees. The Catholics have several splendid churches, one or two Colleges and four or five Nunneries and Charity Schools. The Grey Nunnery is opened to visitors in those departments appropriated to school and asylum for aged and infirm people—but we were not shown into the apartments of the nuns themselves. Some of them (Sisters of Charity) were seen in attendance upon the children in the schools and nurseries, and in charge of the good-natured looking old women who have very neat and comfortable wards assigned them. The children are many of them foundlings and orphans who looked well fed and healthy. We were told that places are provided for them when old enough to earn their own living.—They are of course brought up in the Catholic religion.

The English and Protestant portion of the people including many active Americans who have quietly gone there, are men of great energy, and with much enterprise and method in their business. They give the necessary life and impulse to the great enterprises of the day. The Protestants have several fine churches in the city built handsomely and substantially of stone, among which are one or two new ones now building.

There are many noble public buildings in Montreal—the most striking of which to the stranger, is the French Catholic Cathedral facing on the Place d' Armes. It is an imposing pile of stone, with two massive square towers 230 feet a height overlooking the whole surrounding country. The Church is said to be the largest in America—having accommodations for 24,000 or 14,000 persons. Two tiers of galleries run around its vast interior, and the whole gives one a pervading sense of grandeur in size, but of solemnity rather than of splendor in its altars, paintings, confessionals and decorations. It is worth the weary journey up the west tower, to see the great bell, which there hangs in solemn silence except upon great church festivals or other extraordinary occasions. It is about 12 feet in height, and 12 feet across the bottom, and weighs 27,000 pounds.

Among the other public buildings worthy of notice for the tourist is the Bank of Montreal, McGill College, the new Court House, Bonsecours Market, St. Patrick's Church, and several of the Protestant churches.

A drive round the Mountain, which makes the back ground to the city, affords some fine views of the country on the northern bank of the St. Lawrence, and of the beautiful Cemetery grounds covering 125 acres. The road also passes by many fine villas belonging to the wealthy citizens.

Altogether Montreal is an attractive city to the stranger, and requires more time for its examination than we had at our disposal.

Dred. The sale of this work in England has been immense. Over 100,000 have been disposed of, and the publishers have now in press an edition of 20,000 copies. Mrs. Stowe received for her copy right on these sales about $7,000.

The King of Denmark has conferred upon Mr. Morse, the inventor of the electric telegraph, the order of Dannebrog, and our countryman is now entitled to be called Sir Samuel Morse.

The weather has been mild for the season, thus far,—and up to yesterday no ice had formed in our river.

Poultry for Thanksgiving was in fair supply in our market yesterday,—at 10 to 12 cts per pound for chickens—12 to 16 for turkeys—and 75 cts to 100 each for geese. We cannot say much for the general quality of the poultry however. The turkeys were for the most part of the leanest and *blue*-est description.—There was no more flesh upon them than a grasshopper's legs.

Rev. Mr. Beddler. We hear with regret that this gentleman, for some years Pastor of the Baptist Church in Orono, where his labors have been eminently successful, has received, and decided to accept a call to the Pastorate of the Baptist Church at Damariscotta. Mr. B. has, by the suavity of his manners, and eloquent promulgation of the Gospel, much endeared himself to his parishioners, and to a wide circle of other friends, by whom his decision to remove to another field of labor is received with much regret.

Cole's Perpetual Daily Almanac. Mr. H. G. Cole, whom our people have recently heard as a temperance lecturer, has invented a "Perpetual Almanac," which must prove a very convenient and valuable article for the counting room or office of the business man, or for household reference. The date of the month, and of the week, are so arranged on a revolving card, that by setting the first day of the month against the proper day of the week, the whole month is seen at a glance, with each monthly day against its proper day of the week. An index in the centre, by moving half an inch each day, points to the day of the month then present.

The Perpetual Almanac may be seen at the bookstores of Messrs. Burgess & Co. and of Mr. Duren. Mr. Cole may himself present the article to our business men.

The lecture of Mr. H. G. Cole, last evening, upon the subject of Temperance, was not attended by a large audience. The account which he gave of his experience as a rum seller, and of his conversion, was however, an interesting one. In regard to Laws, although he said he had the understanding to get clear of prosecutions under the old License Law, still his judgment was decided in favor of the totally prohibitive principle as the basis of any law, so far as the cause of the Temperance cause was concerned. He would rely, however, largely upon moral suasion as an instrumentality in the conversion of rum sellers. His own final conversion he seemed to attribute in a large degree to Spiritualism—upon which he proposes to relate his experience.

Morning Star.—*Mr. Editor*—That large portion of your readers who contribute to the treasury of the American Board are no doubt familiar with the facts concerning the packet about to be sent by the children to the Sandwich Islands, for the use of the Micronesian Mission.

We are glad to see that the three Congregational Sabbath Schools in the city, and others in the vicinity, have decided to take a liberal share in the outfit of stock for the packet. But all our children are not in the Sabbath Schools, and an effort made only in them, will deprive many of a share in the work. In other places even the names of infant children are entered in numbers for shares in the packet; the certificates of stock being taken in their names by parents and other friends. The shares are ten cents each—the number of shares taken varying from one to fifty, according to the circumstances of the donor. The contributions would be essentially increased were the names of *all* the children in the Sabbath Schools of our Congregational Societies to be thus entered for stock.

We are happy to learn that a book for this purpose has been opened at the bookstore of E. P. Duren, Receiving Agent of the American Board, to whom contributions will be forwarded; and the neat certificates of stock delivered.

Shall not that book contain, *before the close of the month*, the names of all the children who for any reason are not connected with our Sabbath Schools? None in Societies of other denominations are excluded from entering their names.

A Perfumed Breath.—What a vexatious nuisance remains under the curse of a disagreeable breath when by using the Balm of a Thousand Flowers as a dentifrice would not only render it sweet but leave the teeth white as a alabaster? Many persons do not know that their breath is bad, and the subjects to delicate their friends will never mention it. Pour a single drop of the "Balm" on your tooth-brush, and wash the teeth night and morning. A fifty cent bottle will last a year. For sale by H. Bugbee & Co., and all Druggists. w&s

In Watertown, Ct., every voter in the town was at the polls, except three. One of these had a broken leg, and the other two were too unwell to move.

The Explosion at Acton. A correspondent of the Springfield Republican writes as follows, relating the recent powder mill explosion at Acton:

One man was torn into fragments. A second was thrown to a great distance and stripped of everything but his India-rubber shoes. Poor fellow! He had been at the dangerous work but one day. He was a fine young man. The mill that first exploded was running with no one in it at the moment. When it went off, the air was filled with flying, blazing timber, which in an instant communicated to two others. In one of these were the two unfortunate men who were killed. The other mill—the dry house—had but little powder in it—which blew off the roof. It then took fire and was consumed. A fourth mill had two hundred kegs of powder inside, which was not ignited, although the entire boarding was stripped off, and many beams broken. Two men were at work in the wheel-pit, and crawled out in the stunning noise to see the fragments flying in all directions. It was an awful spectacle.

Three mills exploded. The wind was very high, and the woods took fire. It was expected that the shattered mill, from which the men had escaped would blow up every moment.—The fire was soon within a rod of it, and the powder was exposed to the least spark. After watching it for some time, a man, at the hazard of his life, took a bucket of water, and crawled on his knees to where the fire was blazing and extinguished it. It seems a little astonishing that from every building the pressure was outward. Boards were broken out, windows fell out; one front door of a large house, a quarter of a mile distant, bars out. A window in my barn, a mile off from the mills broke out. Great damage was done to neighboring buildings. I saw an chimney that was affected curiously. It was off on one side toward the mills just one brick, and left standing.

How to make a Raise. An entertaining correspondent mentions a good retort which he once made upon an acquaintance, whose worst fault was to go around the city "sheriff-cobbleerizing" of a summer morning, and who in winter was often for a week at a time in a state of whiskey-punchinessee.

He was once very angry with me. I said to him one morning:

"I'm going to make a raise soon, and as you ought to be the maker, for civility's sake, I'll tell you about it, though it is not essential."

"Why, I intend to get your life insured for ten thousand dollars, and then making you a present of fifty dollars worth of whiskey!—You'll drink yourself to death in six weeks!"

Woman and Politics in Utah. The great festering abomination of Mormonism seems to be fast coming to a head. The women of the church are getting disenchanted with the vile life of the Mormon hierarchy, and the priest and Gov. Young has been obliged to preach to them severely on the sin of whimpering at their lot. He gave them notice in his sermon of Sept. 21st, that at the next conference, two weeks from that day, he should communicate all the wives in the church; they might all leave their husbands if they chose to, but if they did not choose to be free then they must make no more complaints, "but bow down and submit themselves to the celestial law."

Washington, Nov. 16.—A meeting of the Washington Republican Association last night, resolutions were unanimously adopted in favor of the continuance of the organization on the principles of their old platform, and those of the Philadelphia Republican Convention.

A Committee was appointed to draft an address and resolutions congratulatory to the friends of freedom and Fremont, urging upon them the importance of keeping up their local organizations. Remarks were made laudatory of Col. Fremont, and expressive of gratification at his success in the free states, but the association deemed it inexpedient at this time to make any presidential nomination for 1860.

A Bull Butting a Train of Cars off the Track.—The cars on the Lackawanna and Bloomsburg Railroad, says an exchange, were attacked by a bull below the Wyoming depot, on Saturday morning. His chivalship was not on the track, but as the locomotive approached jumped on and made at it with his head down. The cow-catcher of the locomotive was broken and the cars forced off the track. Part of the passengers returned, one part got on the tender and went to Scranton. We have not heard the extent of damage, but have no doubt it was greater to the cars than to the bull.

The three Washburns have been re-elected, and all by majorities, "large enough for all practical purposes:" Israel Washburn, Jr., of Maine, by over four thousand; Cadwallader C. Washburn from Wisconsin, by some thing like eight thousand; and Elihu B. Washburn, from the Galena district, Illinois, by one of 11,672!—*Atlas.*

Loss of Life from Fog in England.—We find in the London Times of Oct. 31, an account of a dense fog which prevailed in London on the previous day, resulting in numerous accidents, and the loss of several lives.

Yesterday a dense fog prevailed in the metropolis and suburbs, in consequence of which several lives were lost, and many persons sustained injuries. Travelling by railway was attended with danger, and most of the river steamboats ceased to run. The fog continued throughout the night. Several serious accidents took place on the railways, and many persons in the district received injuries from being knocked down, and trampled upon by the horses.

The railway guards describe the fog as having been more dense than fog several years past. Indeed the prevalence of the fog led to a circumstance probably unprecedented, several of the races at New Market having been postponed in consequence of it. There was a report that a clerk on the Great Western Railway lost his life near Reading, from being unable to see his way across the rails."

Col. Nathan Boone, the youngest and last surviving of the children of the famous Daniel Boone of Kentucky, died in Missouri a few days since, at the age of seventy-six years.

When M. Godard's balloon was flying near Germantown, Pa., last week, one of the passengers put his head over the basket to give "three cheers," and in doing so lost his teeth. Of course he laughed but little during the rest of the trip.

A venerable old gentleman was found a few nights since by the Philadelphia police busily engaged trying to fit his night key into a knot-hole of a board fence.

The New York Dutchman recently saw some burnt peas put into a hopper of a coffee-mill, and in less than two minutes they were occupying a plate in a grocery window, labelled "old government Java."

Hon. Charles Sumner. The rumor that Mr. Sumner will decline a re-election to the Senate, are without foundation. Mr. Sumner's health is improving.—*Atlas.*

Holloway's Pills. Astonishing Cure of a Bilious Complaint.—Mr. Patrick McKeegan, of Columbia, Conn., aged for upwards of three years from violent pains in the head, a foul stomach, bad digestion, disordered liver, and general nervous debility; he tried various remedies for the relief of this complicated disorder, but to only dreamed of one instead of better, although he also consulted several doctors. Finding that the medical faculty could not cure him, he had recourse to Holloway's Pills, by continuing with this remedy for a few weeks he entirely regained his health, and ever since he has not had the slightest return of his complaint.

TO THE DAILY WHIG AND COURIER

LATER FROM EUROPE.

ARRIVAL OF THE

City of Washington,

AT PHILADELPHIA.

PHILADELPHIA, Nov. 18.

The new steamer City of Washington from Liverpool 4th inst., arrived here to-day.—There is little political news. Consols closed at 93 and 93.

A Vienna dispatch of the 2d inst. states that on the 23d of Oct. the *Porte* together with England and Austria, had settled that the occupation of the Black Sea Danubian principalities should be prolonged.

The British squadron at the Isle of Serpants has been reinforced.

The Neapolitan squadron had not sailed. It is taking provisions for six months.

The Paris Times correspondent states that the influence of Russia in the Danubian principalities increases from day to day. The same writer says that England is quite as influential at the proposed conference as Austria.

Constantinople advices state that the *ultimatum* of England has been forwarded to the Sash of Persia.

The Persian besieging army at Herat, had taken possession of the environs of that city and were fortifying them. A later despatch states that the Afghans have been defeated by the Persians and six thousand prisoners taken.

The Anglo-Saxon from Quebec, arrived at Liverpool on the 8th inst. The Neapolitan minister remained at Paris and showed no disposition to leave.

Discontent prevailed among the manufacturing districts of France from apprehended commercial reforms.

The London Times, in its city article, says, "Affairs are buoyant and the market presents a less favorable appearance.

Private letters from Paris do not indicate any decided change in financial matters, altho' the condition of the Bank is improved. There is no return of confidence.

The British fleet is formally announced to remain in the Black sea till Russia fulfils her engagements. Britain, Austria and Turkey seem to be firmly united in this policy, and the three powers are making strenuous efforts to induce Louis Napoleon from conquering with Russia and Russia is making equal efforts to secend them in France.

The reported French and English embarkations at Naples have landed at Marcella, and marching on from the fleet will occasionally visit Naples to see that all goes on quietly.

Spanish affairs are unchanged, but the second of the stability of Narvaez's government are contradictory.

Napoleon conquires at Compeigne, where he has had a lengthened interview with Baron Hubner, Austrian plenipotentiary, concerning the statement that Spain is organizing a war in Italy, which is confirmed.

A Committee of the Germanic Diet have reported against Prussia's claims upon Neufchatel, but England has offered, in conjunction with France, to arbitrate in the matter.

The Free Trade Association of Hamburg have voted in favor of taking steps to abolish the Hanoverian State Dues.

A change in the Turkish Ministry is contemplated.

Reading Persian is now Venice.

The exportation of corn is prohibited from Odessa until July next.

Liverpool Breadstuffs Market, Nov. 4th.—The market closed dull.—Flour is quiet with the turn in favor of the buyer. Southern 32s 9d a 35s 6d; Ohio 35s a 37s. Wheat quiet and generally unchanged—Red quoted 8s 9d a 9s 3d. Corn quiet but steady—White, 34s 6d a 35s; mixed 33s a 33s 6d; yellow 33s 6d a 34s—Beef dull. Pork dull. Lard quoted 74s, and tending downward.

From Kansas.

CHICAGO, Nov. 13.

Our dates from Kansas are to the 10th inst. Hayes, the murderer of Buffano, was released on bonds of Incompte on the 8th inst., on his own bail in the sum of $10,000. Sheriff Jones was his bondsman. Gov. Geary ordered his re-arrest, but he had already escaped to Missouri. Gov. Geary has threatened to hold Marshal Donald responsible for the re-capture of Hayes.

Markets.

NEW YORK, Nov. 18.

Flour 10 cents lower and closes heavy—common to straight State 6,25 a 6,45; Upper Lake 6,50 a 6,65; Common to good Ohio 6,55 a 7,25; extra Genesee 7,50 a 8,00. Southern quiet—mixed to good 7,00 a 7,40; fancy and extra 7,45 a 8,00. Canadian lower—superfine 6,25 a 6,70; extra 6,75 a 7,75.

Wheat 2 a 3 cents lower—Canada on white 1,50 a 1,55; Tennessee red 1,61; Ohio white 1,60; do. red 1,15; Illinois white 1,55; Southern red 1,50; Upper Lake red 1,51; Chicago 1,52 a 1,54; Milwaukie 1,38 a 1,40.

Corn—mixed 70; yellow 71 a 72.

Pork lower and unsettled—Mess 17,93 a 18,00; prime 17,00 a 17,12.

Beef—Country mess 8,50 a 9,00; prime 6,00 a 7,00; repacked Chicago 10,50 a 11,00.

Coffee active—Rio 9½ a 11; Java 14½.

Sugar firm—Lower—New Orleans 9½; Muscovado 8½ a 9½; Porto Rico 9½ a 10.

Molasses buoyant—Porto Rico 59 a 60; Muscovado 50 a 52.

Rosin—It will be recollected that a bill making an appropriation of $20,000 for the relief of the suffering in Kansas was recently rejected in the Vermont Legislature. We understand that the vote has been reconsidered, and the bill has passed the House and now awaits the action of the Senate. It will probably come up in that branch to-day, with a prospect of its passage.

BREACH NEW. On Friday evening, the house of Mr. McKenney, 425 Congress street, was entered through the cellar window by thieves. A sleeping room, in the second story was entered, and his pants, containing $160, were stolen.—*Portland Argus.*

The alarm of fire last night was occasioned by the burning of a couple of old wooden buildings at the junction of York and Danforth streets. The first took in the store of the front building and when discovered the whole was in flames and burnt with its entire contents. The upper part of the building was occupied by Irish families, who barely escaped with their lives. Some of the children, we hear, were badly burned. The building adjacent was also occupied by Irish families, who saved their goods.—*Portland Argus.*

The Richmond Enquirer tells the Democracy of New York they need expect nothing, as they deserve nothing, from Buchanan.—"New York did nothing for him, and it is not worth upon him to do any thing for New York." How do the New York Democracy like the crack of the lash?—*Albany Jour.*

There is a shop kept by a lady in Barnsley, in the window of which appears these words: "No reasonable offer refused."

A THREASONABLE PLOT.—A correspondent of the N. Y. Herald, writing from Richmond, Va., says that the latest experiment deliberated upon by Southern disunionists is a scheme for the control of Mr. Buchanan's administration, or the defeat of his election. It is proposed to bring the President elect up to the mark of Southern nullifiers, or to compass his defeat by giving a sufficient number of the Democratic electoral votes of the South to other candidates to throw the election into the House. The conspirators do not expect any satisfactory answer from Mr. Buchanan—they do not desire it.—Their object is disunion and the spoils of a Southern confederacy.

At Cincinnati, a few days since, a German washwoman severely thrashed two tormentors who insisted upon taking water from her sisters for their horses.

When his physician asked him to take a walk upon an empty stomach, Sydney Smith asked "upon whose?"

OLD DR. CULVERWELL'S

(Member of the Royal College of Surgeons (1827,) Licentiate of the Hall (1824,) and 25 years Medical Referee, &c.)

Radical Regenerator

FOR ANNUAL WEAKNESS,

In all its forms, as Nocturnal and Diurnal Emissions, Nervous Irritability, Premature Decay, Lost of Virility, Impotency and all the sad evils arising from early indiscretion.

This excellent Remedy, discovered by the world renowned Dr. CULVERWELL, in London, the most successful practitioner in his line for the last 30 years, is now for the first time offered to the afflicted in the fullest confidence that its extraordinary virtues. Its salutary effect is felt at instantly felt, and it will doubtless at once supersede all other means resorted to, medical, surgical or otherwise, to arrest and to cure this awful disease. A single trial will convince the most sceptical, that a safe and perfect cure may now be had at the expense of a few dollars, which up to this date could not be procured for all the gold of the world. The heavy expenses incurred in bringing this article before the public could not be risked were its superiority over every means heretofore employed for the same purpose not a sure guarantee that its employment by one person would, through recommendation, result in an event all sought for by many.

DR. CULVERWELL'S admirable and entirely novel plan of treating these diseases, is in the interest of humanity, recommended to physicians throughout the land, to whom every facility will be afforded for testing its wonderful efficacy in their private practice.

Full and plain directions for all the different varieties of the complaint accompany Dr. Culverwell's REGENERATOR-REMEDY, so as to enable every one to treat himself or herself successfully. Price $2, on receipt of which it will be forwarded by mail, free of postage, to any part of the country. Address, Messrs. BRIDGMAN & CO., Druggists and Apothecaries, 158 Grand St., New York, Sole Agents for the United States and Canada. Nov. 19, 6 mo'ly.

Card to the Public

Bickford defines his position!

I MUST TELL my old personal friends, the good humored public, that my arrangements for the winter season are now completed, by which I am to be daily supplied with abundance of OYSTERS, FRESH FISH, CHOICE FRUIT, and other articles for the supply of my Stall at the Market House.

Speaking of OYSTERS—I wish it understood that I furnish them raw, or cooked, in any style, cold or hot, at my Eating Room, to families or parties at any time or any place. If you wish to refresh your friends with a really nice Oyster Stew let Bickford know it, and it shall appear upon your table, as if by the enchantment of Aladdin's Lamp. Supper of the richest PASTRY, in all varieties.

FRESH FISH, in all their varieties, in their season.

FRUITS AND VEGETABLES.

☞ Bickford is deportedly thankful for past favors, and looks hopefully forward to the future. Allow me to say, gentlemen, fairly and impartially, that this business is getting rather hard, and therefore it is all important that those who have neglected to pay their little bills should do so at once, for I wish to be on friendly terms with every body.

My Eating Stall at the Market is elegantly supplied, and will be found exceedingly convenient for strangers, gentlemen and ladies, and for those debarred from their meals.

Call in—call us one—and all will be well.

Ever and forever,

THOMAS BICKFORD.

FIRST GREAT

AUTUMN & WINTER STOCK

OF

DRY GOODS & CARPETING,

Embracing every variety of style and fabric, from the most popular establishments of

EUROPE AND AMERICA.

Our FOREIGN DRESS GOODS, SILKS, &c., are selected principally from the stocks of celebrated French and English Importers in New York.

Our LINEN HOUSE-KEEPING GOODS, MUSLINS, EMBROIDERIES, &c., are of our own *importation*, direct from Irish and Scotch Manufacturies.

Our DOMESTIC GOODS, which compose by far the largest and most varied Stock in the city, are mostly obtained from Commission Houses and Auctions.

Our Stocks of RICH BRUSSELS, VELVET TAPESTRY, ENGLISH and COMMON CARPETINGS, are largely of *our own importation*, and the balance purchased from the first establishments in the country. The facilities which we possess for procuring these Goods enable us to sell them at exceedingly low prices.

Our UPHOLSTERY DEPARTMENT is fully stocked with Rich Curtain Damasks, Embossed Velvets, Drapery Muslins, Drapery Tassels, Cornices, &c., etc. Having attached to our establishment an Upholsterer, who has had large experience in his business in New York and Boston, we are prepared to furnish and put up all descriptions of Curtains and Drapery Goods, in private dwellings, hotels, steamers, &c., in the most modern and approved styles. He will also make and lay down Carpets in a manner entirely satisfactory to our customers.

Our BEDDING DEPARTMENT embraces a Large Stock of Hair, Palm Leaf, and Excelsior Mattresses, Bed Ticks, and Cribs Blankets, Marseilles, Lancaster, Toilet and Imperial Quilts, Feathers, &c.

In fact, we feel confident that we can offer our customers every inducement to make us an early call.

California Steamers,

Carrying the United States Mail.

5th and 20th of each Month.

Greatly Reduced Prices. 25 lbs. Baggage Free.

Through Tickets, including transit of the Isthmus, via Panama R. R.

By order of the Postmaster General, the United States Mail Steamers will hereafter be despatched from New York direct to Aspinwall on the 5th and 20th of each month.

Passengers are landed at the Railroad Depot, Aspinwall, and conveyed across the Pacific Steamers *without any extra expense*. This is the only line giving entire Through Tickets, including meals, on the Isthmus.

Transit made in *four hours entirely by daylight*, thus avoiding the great exposure by night in open boats to fever and ague, and 200 miles of uncertain lake and river navigation, over rocks and shoals.

Arrangements have now been completed so that the regular U. S. Pacific Mail Steamer will leave Panama for San Francisco immediately on arrival of the Atlantic Mails and passengers, thus securing passengers by the Mail Line a sure and short passage, without any detention on the Isthmus.

☞ *Tickets must be signed by one of the Company's Agents before they will be issued by the Agent at Panama*, and Tickets thus signed can be obtained of the *only authorized Agent* or the Atlantic and Pacific Mail Steamship Company, in this city. C. L. BARTLETT, Agent,

J. RUSSELL SPALDING'S

ROSE MARY

This great and popular parlor perfume, decided queen of the toilet and beauty's choice in the world for the

HAIR.

It imparts a luxuriant growth, a brilliant gloss, ornaments, invigorates, cleans, cools, removes dandruff, relieves headache, and has probably been more successful in curing and preventing baldness and premature decay of the hair with as much ease as any article ever known. It has stood the test of time and use, and is the best article yet produced.

Prepared only by J. RUSSELL SPALDING, Manufacturing Chemist, 17 Central St., 27 Hanover St., opposite the Museum, Boston. Price, one small bottle, 25 cts. Large size, 50 cts. The genuine article is on every bottle of the genuine.

WATER PROOF BLACKING,

AND LEATHER PRESERVATIVE.

Keep your feet dry and you will seldom need a PHYSician.

IS it not a truth that when the feet are often wet, it is one of the great causes of colds and consumption? It is a truth that when leather is often wet and dried, it soon becomes hard, stiff, and cracks but, if it is water-proof, this is remedied. By the application of this preparative, it remains soft, and entirely impervious to water.

After being engaged for 25 years in the manufacture of Leather in a tannery, I had being often troubled with wet feet myself, I was led to experimentize for different compositions, and found it easy to make it water-proof, but at the same time extremely injurious to the leather. At last by a chemical process, I discovered a preparation which perfectly harmonizes with the astringent properties with which leather is tanned. It will not only make leather water-proof, but it likewise softens the leather, and it will

Positively wear twice as long.

I have now used it for three years, and a large part of that time have worked in a wet Tannery, with my boots constantly in water, and have not had my feet wet during that time. I can therefore in all confidence, recommend it to the public as the best article in the market.

THE GREATEST MEDICAL DISCOVERY Of the Age.

DR. KENNEDY, of Roxbury, has discovered in one of our *common pasture weeds*, a remedy that cures

EVERY KIND OF HUMOR;

From the worst Scrofula down to a common Pimple.

He has tried it in over 1100 cases, and never failed except in two cases, (both blunders, humor.) He has now in his possession over two hundred certificates of its virtue, all within twenty miles of Boston.

Two bottles are warranted to cure running sore mouth.

One to three bottles will cure the worst kind of pimples on the face.

Two to three bottles will clear the system of biles.

Two bottles are warranted to cure the worst canker in the mouth and stomach.

Three to five bottles are warranted to cure the worst case of Erysipelas.

One to two bottles are warranted to cure all humor in the eyes.

Two bottles are warranted to cure running of the ears and blotches among the hair.

Four to six bottles are warranted to cure corrupt and running ulcers.

One bottle will cure scaly eruption of the skin.

Two to three bottles are warranted to cure the worst cases of ringworm.

Two to three bottles are warranted to cure the most desperate case of rheumatism.

Three to four bottles are warranted to cure the salt rheum.

Five to eight bottles will cure the worst cases of scrofula.

A benefit is always experienced from the first bottle; and a perfect cure is warranted when the above quantity is taken.

Reader, I peddled over a thousand bottles of this in the vicinity of Boston. I know the effect of it in every case. So sure as water will extinguish fire, so sure will this cure humor. I never sold a bottle of it but that sold another; after a trial it always spoke for itself. There are two things about this herb that appear to me surprising; first, that it grows in our pastures, in some places quite plentiful, and yet its value has never been known until I discovered it in 1845—second, that it should cure all kinds of humor.

In order to give some idea of the sudden rise and great popularity of the discovery, I will state that in April, 1853, I peddled it, and sold about six bottles per day—in April, 1854, I sold over one thousand bottles per day of it.

Some of the wholesale Druggists who have been in business twenty and thirty years, say that nothing in the annals of patent medicines was ever like it. There is a universal praise of it from all quarters.

Several cases of epileptic fits—a disease which was always considered incurable, have been cured by a few bottles. O, what a mercy if it will prove effectual in all cases of that awful malady—there are but few which have even more of it than I have.

I know of several cases of Dropsy, all of them aged people, cured by it. For the various diseases of the Liver, Sick Headache, Dyspepsia, Asthma, Fever and Ague, Pain in the Side, Diseases of the Spine, and particularly in Diseases of the Kidneys, &c., this discovery has done more good than any medicine ever known.

No change of diet over necessary—eat it to best you can get, and enough of it.

DIRECTIONS FOR USE.—Adults, one tablespoonful per day—Children over ten years, dessert spoonful—Children from five to eight years, teaspoonful. As no directions can be applicable to all constitutions, take sufficient to operate on the bowels twice a day.

The Principal Office for the State of Maine and the British Provinces, is at the Drug and Medicine Establishment of I. H. HAY, 14 & 17, *Market Square, Portland, Maine*, to whom all orders should be addressed. Sold by respectable Druggists throughout the United States and British Provinces.

PRICE $1.00.

AYER'S CHERRY PECTORAL

FOR THE RAPID CURE OF

COUGHS, COLDS, HOARSENESS, INFLUENZA, BRONCHITIS, WHOOPING COUGH, CROUP, ASTHMA, INCIPIENT CONSUMPTION,

and for the relief of consumptive patients in advanced stages of the disease.

We need only speak to the public of its virtues. Throughout every town, and almost every hamlet of this American States, the wonderful Force of this pulmonary complaints have been already known. Every day are the families in every civilized country on this continent without some person of experience of its effects; and there yet the communities anywhere which have not among them some living trophy of its victory over the subtile and dangerous disease of the throat and lungs. While it is the most powerful medicine yet known to man for the formidable and dangerous disease of the pulmonary organs, it is also the pleasantest and safest remedy that can be employed for infants and young persons. Parents should have it in store against the insidious enemy that steals upon them unprepared. We have abundant grounds to believe the Cherry Pectoral saves more lives by the consumptions it prevents than those it cures. Keep it by you, and cure your colds while they are curable, nor neglect them until no human skill can master the inexorable canker that feeds upon the vitals, carries our life away. All know the dreadful fatality of long disorders, and all they know too it yielded to this remedy, we need not do more than to refer them to the old maxim that the best cure be. We spare no pains, no cost, no skill to produce it the most perfect possible, and thus afford those who rely on it the best agent which our skill can furnish for their cure.

Truth must and will prevail.

This medicine speedily and effectually cures the most virulent form of secret diseases, and eradicates every particle of infectious matter, from the patient, to a perfect state of *Health and Purity.* And as a medicine which must benefit everybody, from the simply delicate to the confined and decaying invalid, no equal is to be found, if acting both as a *Cure and Preventive* of any of the above ailments.

HELMBOLD'S

HIGHLY CONCENTRATED

Compound Fluid Extract Sarsaparilla,

—FOR—

Purifying the Blood, sweeping all diseases arising from Excess of Mercury, exposure and imprudence in life, chronic constitutional disease arising from an impure state of the Blood, and the only reliable and effectual known remedy for the cure of Scrofula, Salt Rheum, Scald head, Ulcerations of the Throat and Legs, Pains and Swellings of the Bones, Tetter, Pimples on the Face and all scaly Eruptions of the Skin.

It is gratifying to the proprietor of these medicines to be able to state that it is now nearly three years since they were first introduced, during which time they have been extensively used in various parts of the United States, and have given to patient and practitioner the highest degree of satisfaction in the various cases in which they have been employed, whether in town, country, hospital, or private practice, they have invariably given the most decided and acquiescent satisfaction, and produced the most salutary and beneficial effects. Numerous letters have been received from the most distinguished physicians in the country, and from the professors of several medical colleges, recommending in the highest terms the value of these medicines and their superiority over all other preparations for such complaints as the proprietor recommends. Numerous preparations of Sarsaparilla and Buchu, and various modes of preparing them have been tried, all of which of course will differ according to the mode of preparation which each individual may adopt.

These medicines require considerable care in the preparation, and the employment of different menstrua in successive operations to take up the extractive matters, and, in consequence, the most frequently improperly made, and in not unfrequently much impaired, if not rendered totally inert, by the injudicious and wrongful management of those unacquainted with pharmaceutical preparations. It is, therefore of the highest consideration and importance to the public, and to the faculty, that there should be a standard preparation of uniform strength and possessing the most eminent virtues. To effect this, I did obviate the difficulties, I to have made a number of experiments to ascertain the most effectual mode of extracting the virtues of the Sarsaparilla and the Buchu, and to discover the most eligible menstrua for their exhibition. The experiments have resulted most favorably, and it is with much pleasure I now offer to the public and the faculty my Compound Fluid Extracts, which contain all the virtues of the articles they are represented to be made from in a highly concentrated form, and are the most active preparations which can be made. Two tablespoonfuls of the Extract Sarsaparilla added to a pint of water is equal to the Lisbon Diet drink, and one bottle fully equals in strength the contents of Syrup Sarsaparilla or decoction as usually made.

—PRICES—

Fluid Extract Buchu $1 per bottle or 6 for $5

Professor Humphrey's

SPECIFIC

Homœopathic Medicines,

.....FOR.....

Families, Travelers, and others.

THESE Medicines have been carefully prepared, with a view of supplying families and others, with *Specific Remedies* against all the more common diseases which occur in every-day life. The list includes not only remedies for all the more common diseases, such as Coughs, Colds, Headaches, Derangements of the Stomach, Fever, Worm Complaints, Diarrhœa, &c., but also for those more sudden and violent diseases which require to be met on the spot at the moment, such as Cramp, Cholera, Dysentery, Inflammation, &c., for whose treatment it is very important always to have the proper remedies on hand. There are also remedies for those more delicate Female derangements which a lady finds it so difficult to disclose, but yet a freedom from which contributes so much to the happiness and enjoyment of life.

These Medicines are prepared in the form of large Sugar Pellets, one of which is sufficient for the largest dose, and put up in boxes properly labelled. Each box contains 30 or 40 Pellets, and 35 boxes, for the different kinds, are enclosed in a case, accompanied with a small Manual or Book of Directions, giving a concise description of the diseases treated, and directions for giving the medicines, diet, &c., necessary for a cure. Cases, also, containing four or six of the small boxes, are put up, which may be supplied with any of the different kinds at the option of the purchaser.

The advantages of Specific Homœopathic Medicines.—In prescribing other Homœopathic specifics a dozen or twenty will be recommended for a cough, a headache, diarrhœa, or fever; and much care, study, and discrimination is required to select the proper one. But here you have a Specific Remedy for each particular disease, and hence are able to use them with benefit and precision without that labor and study which the business man is so ill qualified to bestow, and without that research and examination which, to the mother, nurse, or invalid, is so perplexing, annoying, and unsatisfactory. The advantages are so obvious as to commend them to all.

Prepared by Dr. P. HUMPHREY, Auburn, N.Y., and sold by C. B. WALKER, Agent for Maine, at 34 Main street.
